Just a few comments.

1. 1.2.1: the site boundaries have expanded just a bit since the original acreage was estimated. The site sits somewhere between 140 to 150 acres.
2. 1.2.1: It is stated that 'tank bottoms' are present. To my knowledge we have no direct information to classify or define these as such. Please refer to these as an asphalt or tar-like hydrocarbon material.
3. 1.2.1, 1st paragraph after bullets: Please revise the first sentence with the following: Properties where refinery waste is present at the surface are fenced and locked to deter trespassing and potential contact with the refinery waste.

Katrina and Todd,

Please find the attached Health and Safety Plan, Revision 01 for the Wilcox Oil Company Superfund Site. We have also uploaded a copy to the Sharepoint website. Please let me know if you have any questions.

Thanks,
